

(PL 30)

Tyres with the same dimension but from different manufacturers or even models usually also have a different internal volume. So you can't say that e.g. a 90/90-21 mousse fits into a 90/90-21 tire.

This table lists all tyre-mousse combinations that have been tested by us. This guarantees which mousse is best suited to which tyre.

TYPE   DIMENSION	EXTREME	SOFT	NORMAL	HARD
<b>X-GRIP - TYRES</b>				
SuperENDURO-F   80/100-21			EV-0	
HULKY BOY   90/100/21			EV-2
